

Dolby Collaborates with Lenovo™ on the First Laptop of its Kind

August 30, 2018

Lenovo Yoga™ C930 Features Dolby Vision HDR and Dolby Atmos Speaker System

BERLIN and SAN FRANCISCO, Aug. 30, 2018 (GLOBE NEWSWIRE) -- Dolby Laboratories, Inc. (NYSE:DLB) and Lenovo (HKSE:992) announced today the world's first laptop featuring Dolby Vision and Dolby Atmos Speaker System. The Lenovo Yoga C930 combines cinema-inspired HDR imaging technology with speakers, custom-designed by Dolby, that deliver breakthrough moving audio. Together, Dolby Vision and Dolby Atmos Speaker System will change the way consumers experience entertainment on the go.

Dolby Vision transforms your viewing experience with ultra-vivid picture quality.

Dolby Atmos Speaker System creates an amazing experience over Dolby custom-designed and tuned PC speakers, and over any pair of headphones.

The Lenovo Yoga C930 combines cinema-inspired HDR imaging technology with speakers, custom-designed by Dolby, that deliver breakthrough moving audio.

A defining characteristic of the Yoga C930 is its advanced Rotating Sound Bar and innovative hinge design. During the design process, Dolby and Lenovo worked together to develop this unique hinge to optimize the audio experience for this device. This will allow consumers to enjoy an immersive Dolby Atmos Speaker System experience in all of the Yoga C930's laptop or tablet usage modes.

"Dolby pushes the boundaries of innovation, bringing new ways to enhance consumer experiences," said Giles Baker, Senior Vice President, Consumer Entertainment Group, Dolby Laboratories. "The Yoga C930 with Dolby Vision and Dolby Atmos Speaker System sets a new bar for entertainment on the go."

"Lenovo and Dolby have a longstanding partnership in marrying advanced audio and imaging technologies with intuitive devices," said Johnson Jia, Senior Vice President and Acting General Manager of Lenovo Intelligent Devices Group's Consumer PCs and Smart Devices. "We're excited for entertainment lovers to get fully immersed into the amazing multimedia experiences offered by the new Yoga C930."

Dolby Vision transforms your viewing experience with ultra-vivid picture quality. When compared to a standard picture, Dolby Vision can deliver colors never seen before on a screen, incredible contrast, highlights that are up to 40 times brighter, and blacks that are 10 times darker. The result is a refined, lifelike image that will make you forget you are looking at a screen.

Dolby Atmos Speaker System creates an amazing experience over Dolby custom-designed and tuned PC speakers, and over any pair of headphones. It delivers breathtaking, moving audio that flows around you, making you feel like you're inside the action as sound comes alive with richness, depth, and precision.

Lenovo also announced a lineup of other devices featuring Dolby technologies, including:

- ThinkPad X1 Extreme featuring Dolby Vision and Dolby Atmos
- Yoga S730 featuring Dolby Vision* and Dolby Atmos Speaker System
- Yoga Book C930 featuring Dolby Atmos

**The Yoga S730 is Dolby Vision capable pending a future software update.*
